-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

"Can be" is vague and indefinite. A structural basis for the folding function, or proper means-plus-function language should be used.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin.

Martin discloses an integral plastic gutter (see column 4, lines 32-33) having a drip edge with a lip (42) extending under the roof and a leaf screen (26), with a hinge (24) for allowing the gutter to be essentially flattened, as claimed.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Olson.

Olson discloses an integral gutter having a drip edge with a lip extending under the roof and a leaf screen, as claimed.

5. Claims 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Olson.

Claim 3 differs from Olson in recitation of the system being made of plastic. It is submitted that Olson discloses that metal or other suitable materials (column 5, lines 26-32) may be used. Therefore, it is submitted that the use of plastic, a known gutter material, would have been obvious for one skilled in the art.

Claim 6 differs from Olson in recitation that the system can be folded essentially flat. It is submitted that metal is bendable, and therefore may obviously be folded.

6. Claims 2 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claim 7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The recitation of an integral gutter having a drip edge with a lip extending under the roof along an upper interior edge, a leaf screen along the upper exterior edge, and a

soffit vent along the lower interior edge. Olson discloses a soffit vent, but the soffit vent of Olson is removable.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other references of interest include /Faulkner, Morrissey, McLean, Wennerstrom, Spradlin and Davis.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Upton whose telephone number is 571-272-1169. The examiner can normally be reached on 7:30-5:00, off every other Monday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on 571-272-1166. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
